

CATHOLIC SCHOOLS BROKEN BAY

PATHWAYS & PARTNERSHIPS

By linking classroom learning to the real world, the Pathways & Partnerships program provides students with practical opportunities and exposure to current industry information, allowing our students to make informed decisions at each stage of their school journey and beyond.

INDIVIDUAL PATHWAYS

FUTURE PROOF

Pathways & Partnerships encourages students to embrace their interests and passions while assisting them to understand and develop the essential 'in demand' work-ready skills required for jobs of the future.

The future of the world is in our classrooms today!

Pathways & Partnerships delivers many benefits, some of which include:

- providing all students with opportunities to develop an understanding of the skills they will need to successfully navigate the world of work, making them more resilient and employable into the future;
- working with schools to build an understanding of the future skills our students need by integrating industry opportunities and experiences into the curriculum, so students can see the relevance of their learning and how this translates to life after school;
- offering a range of unique careers and pathways experiences and opportunities for all students, connecting school to the world of work;
- students making informed decisions throughout their school life because of their deep understanding of the future work skills they need to succeed;
- providing parents with the required knowledge and tools to assist their children on the Pathway transition beyond school.

The future of the world is in our classrooms today!
